### **DETAILED ACTION**

1. This office action is in response to amendment filed 04/18/2005 and interview summary 6/7/2005.

#### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview (see attached) with attorney of record Alan E. Kopecki on 6/7/05.

The application has been amended as follows:

Replace the abstract with following new abstract:

#### **Abstract**

A method and a device for evaluating the deformations or forces to which a structure having an elastomeric body (2) is subjected. The device includes a dipole (6), the dielectric (3) of which is formed by the elastomeric body, and an electronic analyzing circuit sensitive to a

Art Unit: 2858

variation of a capacitive characteristic of the dipole caused by the deformations of the elastomeric body. In particular, but not exclusively, the invention relates to a device for evaluating the forces to which a pneumatic tire is subjected when rolling, as it passes through the contact area. The invention applies similarly in other structures having an elastomeric body, such as, for example, the elastomeric joints intended for the chassis system of vehicles.

In claim 25, add at the end after "tire", --wherein the resistivity of said elastomeric body being greater than  $10^{13} \Omega \cdot \text{cm}$  --

In claim 26, delete, -- the resistivity of said elastomeric body being greater than  $10^{13} \Omega \cdot \text{cm}$  --

In claim 28, add at the end after "deformations", --wherein the resistivity of said elastomeric body being greater than  $10^{13} \Omega \cdot \text{cm}$ —

In claim 29, delete, -- the resistivity of said elastomeric body being greater than  $10^{13} \Omega \cdot \text{cm}$  --

***Allowable Subject Matter***

3. Claims 25-45 are allowed.

***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

Art Unit: 2858

The primary reason for allowance of the claims is the inclusion of a device for evaluating tire deformations comprising a dipole having filar electrodes, and the dielectric of said dipole is formed by an elastomeric body, wherein the resistivity of said elastomeric body being greater than  $10^{13} \Omega \cdot \text{cm}$ .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
